

IN THE DRAWINGS:

Please amend the drawings as shown in the attached sheet.

REMARKS

The drawing stands objected to because of the inclusion therein of a schematic showing of certain elements that are not identified with the element names. Appropriate amendment has been made in the attached new sheet of drawings. Approval of the same is requested.

The Examiner has required an Abstract. An abstract has been added and thus withdrawal of the objection relating thereto is requested.

The Examiner has objected to claims 2-4 because of an error in line 8 of claim 2. The word "transistor" has been changed to "resistor" to overcome the objection. Withdrawal of the same is thus requested.

Claim 4, which is in multiple dependent form, stands objected to because it depends from another claim (claim 3) in multiple dependent form. To overcome this objection, claim 3, as it depends from claim 2, has been rewritten as new claim 5.

Claims 7-11 correspond to now cancelled claim 4, with separate dependency upon claims 1-3 and new claims 5 and 6. Withdrawal of the objection to claim 4 is thus requested.

Claim 2 stands rejected under 35 U.S.C. § 112 because of the inclusion of the language "such as buffer condenser" This language has been deleted and included in new claim 6, which depends from claim 2.

Claims 1-4 were initially pending. Claim 4 is hereby cancelled. New claims 5-11 are presented.

Claim 1 is indicated to be allowable. All remaining claims depend from claim 1. The remaining claims have been amended to overcome the alleged problems. In light of that, all claims are now believed allowable.

Reconsideration of the objection to claim 3 and the rejection of claim 2, and allowance of the case are requested.

Respectfully submitted,

By

John S. Mortimer, Reg. No. 30,407
